PROGRESSION OF LEARNING Learning to be prioritized for 2022/23-in red Edited October 2022

Progression of Learning and Essential Knowledge

The progression of learning and essential knowledge for English as a second language reaffirms the crucial role that knowledge plays in the development of the ESL competencies. The progression and essential knowledge are teaching tools which outline the knowledge required by students to become competent ESL learners. They complement the ESL program. They assist teachers in their overall planning and also outline when knowledge is to be introduced, practiced and acquired. They will help teachers ensure that their students' learning, in addition to competency development, is consistent with their peer groups across KSB. It will also assist in bringing consistency to the teaching of English within each school and throughout Nunavik.

In the annex of this document, teachers will find lists of suggested vocabulary and grammar that students require in order to be competent users of English. These lists correspond to items found in the essential knowledge. (Please note the Annex is being updated and will be re-released shortly.)

Structure of the Progression of Learning

The progression is divided into categories. These include: Functional Language, Language Conventions, Strategies, Text Components, the Response Process, and the Writing Process. The progression of learning is presented in the form of tables that organize the elements of knowledge. The following legend is used in the progression:

	This symbol indicates that the student is in the process of constructing his/her knowledge with teacher guidance . This means:
→	-explicit teaching -use of prompts -Resources are provided by the teacher -Modeling is done by the teacher
*	This symbol indicates that the student applies knowledge by the end of the school year . This means: -student takes initiative -self-directed use of resources -knowledge is used consistently and accurately most of the time?
	This symbol indicates that the student reinvests knowledge. This means: -Reusing -Broadening of the concept -Using of concept in new contexts -Refining -Transfer

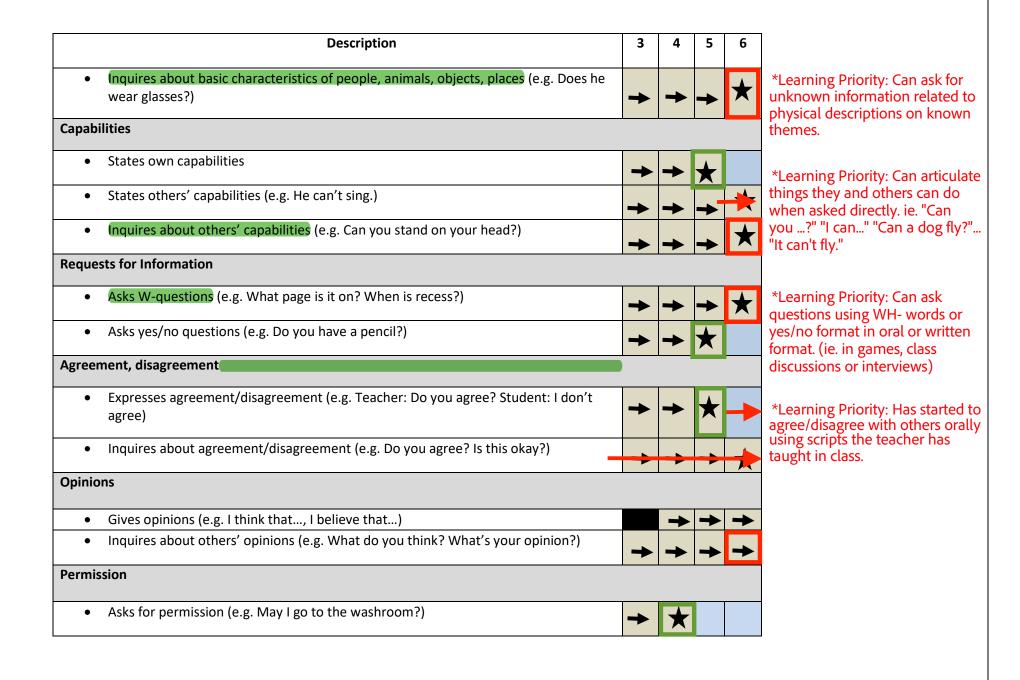

This document, "Learning to be prioritized in 2022-23" is meant to be a tool for teachers to better streamline "what" skills/knowledge to spend their time working on this year if there is evidence that the Covid closures of last year has caused any delays in what was previously expected for your grade's year-end outcomes. If your students have mastered those expectations, you can go further and spend time on the other skills, but those in red are a baseline that we hope can be achievable this year. Your feedback will help us reassess this as the year goes on.

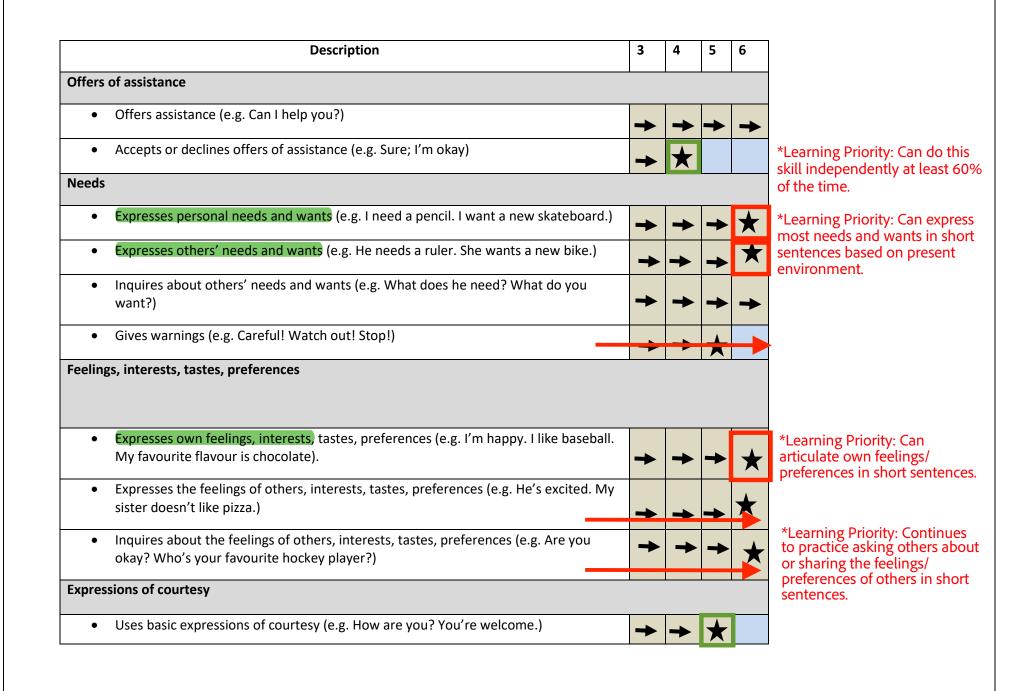

Always start by getting a feel for where your students are and working towards increasing their capacity from that point.

Functional Language (Primary)

Functional language allows students to interact in English. It includes useful expressions and vocabulary. These contribute to the development of ESL Competency 1 "Interacts Orally in English". Vocabulary development also supports the development of Competency 2. As students progress through primary cycles 1 and 2 their repertoire of functional language will become more complex. Their use of expressions and vocabulary will also become increasingly spontaneous and fluent.

Language Conventions (Primary)

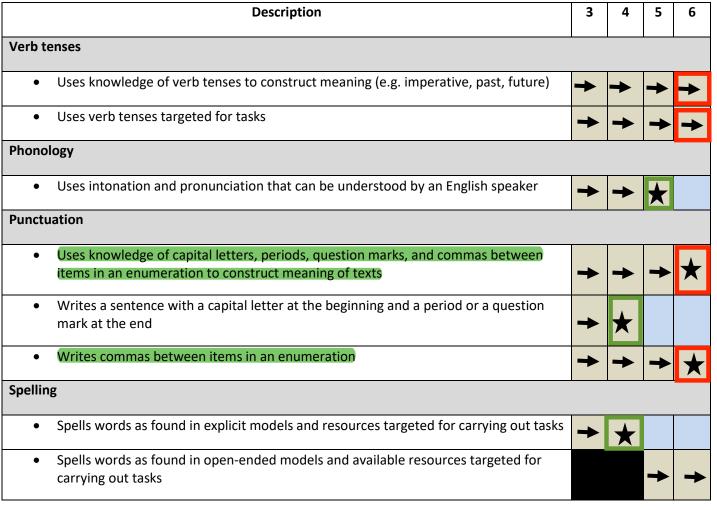

Language conventions refer to grammar, phonology, punctuation, and spelling. Grammar contributes to the development of all three competencies. Phonology supports the development of the oral interaction competency (C1). Punctuation helps develop competencies 2 and 3, and spelling pertains exclusively to competency 3.

Word order										
Uses knowledge of word order in simple sentences to construct meaning	→	→	*							
Forms simple sentences (e.g. I like apples. Emily can sing and dance. Bring your book)	→	*								
Places adjectives before nouns (e.g. red car, beautiful day)	→	→	*							
Uses adverbs in a sentence (e.g. He runs quickly.)		→	→	→						
Plurals										
Uses knowledge of regular and common irregular plurals to construct meaning	+	→	→	*						
Uses irregular plurals frequently encountered in class (e.g. people, children, feet)	\	→	→	\star						
Articles										
Places articles before nouns (e.g. The bag is heavy. It's a computer. She's an athlete.)	+	→	→	+						

*Learning Priority:

- Can orally form a sentences independently about themes or topics that are familiar to the student.
- Can produce a written sentence independently about themes or topics that are familiar to the student.
- Errors may occur as students add complexity to sentences using adjectives, prepositions (esp. those indication place/ location) or conjunctions (ie. and, but, because, then...)

*Learning Priority: Teacher continues to reinforce irregular verbs and plurals as new vocabulary is encountered.

* Learning Priority: Reinforce previously learned tenses correctly in oral and written.

-Including Imperative; Present, Past and Future Simple tenses; Present and Past Continuous tenses and Present Perfect tense.

* Learning Priority: Uses capital letters at the start of a sentence and simple punctuation at the end of a sentence on at least 60% of writing samples.

* Learning Priority: Sight words (that have been taught and reinforced through modelled use) are spelled correctly at least 60% of the time during independent writing tasks or on spelling tests.

Strategies (Primary)

Strategies refer to compensatory (i.e. communication) and learning strategies. At the primary level, students broaden their repertoire. They begin to name strategies, select, and apply those appropriate for tasks, and reflect on their effectiveness. Strategies contribute to the development of all of the ESL competencies. They should be explicitly taught and modeled for the students. Teachers should also provide opportunities for students to practice each strategy as a whole group, in groups and individually. The use of strategies is not evaluated in the KSB ESL program, however, they are a major component of each of the competencies and are required by all competent learners.

Thinks about the task, decides what actions to take and what resources to use	→	→	→	→
Pay Attention				
Decides to concentrate on the task ie. Start to introduce emotional regulation skills to increase their own awareness of their own best working style.	→	→	→	*
Maintains attention during tasks	→	→	→	→
Use what you know				
Draws on own background knowledge as a source of information	→	→	→	→

*Learning Priority: Classroom strategies to support the student with concentration during independent work in class are effective at least 60% of the time. Help students recognize what works best for them using self-reflection questions.

Description	3	4	5	6
Predicting				
Foretells based on prior knowledge, topic, task at hand, title, pictures, glancing through a text	→	→	→	→
Guess Intelligently (Inferencing)				
Makes intelligent guesses based on all available cues such as context, known words and expressions, visual clues, contextual cues, intonation, patterns	→	→	→	→
Practice				•
Repeats and rehearses, regroups, integrates, and assimilates frequently	→	→	→	*
Uses resources				
Makes use of human resources (e.g. teacher and peers)	→	→	→	*
Makes use of material resources (e.g. word and expression banks, graphic organizers, posters, checklists, quick references, books, thematic, IT, etc.)	→	→	→	→
Takes notes				
 Writes down relevant information in an organized way (e.g. T-chart, Venn diagram, story web) 	→	→	→	→
Skim				
Glances through a text quickly to get a general impression and overview of the content	→	→	→	→

*Learning Priority: Will consult material resources in class before asking teacher or peers for support at least 60% of the time. Teacher should ensure students know which resources are available for each given task in class before they begin independent work.

*Learning Priority: Will try to participate in a new oral or written task at least 60% of the time.

Model and recognize when "starting" strategies are used for students who show fear or uncertainty on how to begin (Strategy examples: choosing a first step, asking clarification questions, observing others, making a written plan, etc.)

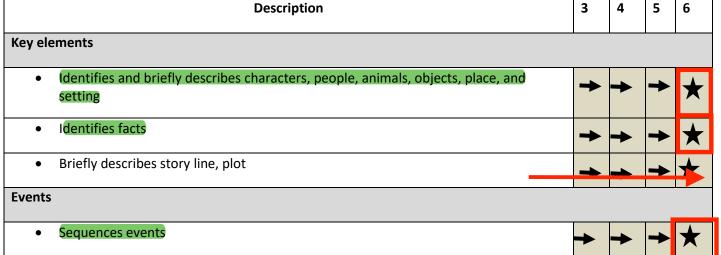

Text Components (Primary)

At the primary level, text components refer to connecting words, contextual cues for familiar topics, overall meaning and key elements. Prior to listening, reading or viewing texts, students use contextual cues to anticipate the content of texts. While they are viewing, listening or reading texts, students use connecting words, key elements, and overall meaning to further construct meaning. Text components contribute to the development of Competency 2.

Connecting words	•							
Uses knowledge of connecting words to construct meaning (e.g. and, but, or)	→	→	→	\star				
Contextual cues: titles, subtitles, synopsis, key sentences, illustrations, table of contents								
 Uses contextual cues to recognize a variety of text formats (e.g. newspaper article, 								
graphic novel, advertisement) and to predict content.	→	→	→	*				
Use contextual cues to construct meaning	→	→	→	*				
Overall meaning								
(dentifies general ideas stated explicitly (i.e. literal meaning)	→	→	→	*				
Finds implied ideas (i.e. Underlying meaning)	→	→	→	→				

*Learning Priority: This can be a good class discussion starter activity using posters or art, even those in other languages unfamiliar to students can reinforce power of context cues.

*Learning Priority: Can show comprehension of a reading/ listening text by orally or in simple written responses answering literal questions.

*Learning Priority: Can share details about a story based on sight words (nouns and adjectives) that have been covered and reinforced by the teachers.

*Learning Priority: Can sequence a story using visual prompts or manipulatives or numbering short written summary statements of plotlines to re-tell the story with at least 60% accuracy.

Responding to Texts (Primary)

At the primary level students begin responding to texts. They are introduced to the basic structure through modeling and the use of graphic organizers. Students build on their ability, with teacher support, to compare their own experiences with the reality presented in texts.

Reflecting on use of response process				
 Uses various means to reflect on use of the response process (e.g. self-evaluation grids, class discussion, peer feedback) 	→	→	→	+

Writing Process (Primary)

At the primary level, students are introduced to the writing process. They will write a variety of well-structured texts using provided models. They will learn to use strategies and to receive and give feedback to improve their texts. This process will allow them to improve their writing skills. The writing process must be modeled explicitly. Teachers should provide students with structure in the form of modeling, whole group activities, sentence starters, and graphic organizers. At the primary level, the writing process is not done in complete independence.

*Learning Priority: Can complete a graphic organizer with some independence after it has been modelled by the teacher (and if are guided through process step by step orally.)

*Learning Priority: Can plan a short independent writing task following a template or writing guide modelled and given by the teacher. Can use visual promptsie. pictures, drawings, video and a list of vocabulary related to the theme.

*Learning Priority: Can produce a "good copy" of a written text and incorporate teacher or peer feedback on spelling, grammar or other errors that were given orally. (Goal for grade 6 texts is between 5-8 simple sentences.)

ESSENTIAL KNOWLEDGE (Primary)

The Kativik School Board's ESL program is centered on the progression of students' competency development. Part of being competent is possessing knowledge. The following is a list, organized by subcategories, that outlines the essential knowledge for all primary students. The knowledge is divided by cycle and by grade level. Arrows indicate when any given point should be explicitly taught, modeled and then practiced by the students. Black boxes denote that the point is generally not taught at the indicated level and blue boxes indicate a mastery of a specific concept. It is important to note that this is a non-exclusionary guideline and represents the minimum to be covered. If a teaching moment arises, teachers should take advantage of it and assist students in constructing the knowledge they require or desire regardless of its presence in the list. The list is intended to provide the minimum to be covered by students at a given level and examples for teachers to build upon.
